

The invention relates to substituted piperdines of general formula (I) in which A^1 , A^2 , R, R^1 and R^2 are defined as in Claim No. 1, to their tautomers, diastereomers, enantiomers, nuxtures, and to their salts, in particular, their physiologically compatible salts with inorganic or organic acids or bases, which comprise valuable pharmacological properties, in particular, CGRP-antagonistic properties. The invention also relates to medicaments containing these compounds, to their use and to methods for the production thereof.
