

A design of the vertical chess "Theater chess" (T'Chess) relates to the intellectual logical games and may be used as the general education game. The design provides for the vertical chessboard with 64 black and white squares. Each square has the window in the shape of the dome for the chess pieces to be inserted and attached with the aids of the magnets. The classical chess rules are applied for two players. The device is equipped with the autonomic illumination and may be realized as the travel game for the car, the air flight, etc., or as a game for the educational institutions, or as the demonstration diagram for the chess tournaments, or as the educational aid.
