

A method of crop growth regulation includes seed treatment by growth stimulator on the base of 1,2,4-triazole derivatives. 3-methyl-1,2,4-triazolyl-5-thioacetate compound of the formula

where at n=1, X-K⁺, HN⁺

at n=2, X-Ca²⁺, Mg²⁺

in the concentration of 0.001 – 0.01% is used as the growth stimulator.
