

The invention relates to a fungicidally active compound of formula (I): where Het is a 5- or 6-membered heterocyclic ring containing one to three heteroatoms, each independently selected from oxygen, nitrogen and sulphur, provided that the ring is not 1,2,3-triazole, the ring being substituted by groups R^8 , R^9 and R^{10} ; X is a single or double bond; Y is $(CR^{12}R^{13})(CR^{14}R^{15})_m(CR^{16}R^{17})_n$; m is 0 or 1; n is 0 or 1; and R^1 to R^{17} each, independently, have a range of values; to agrochemical compositions which comprise at least one of the novel compounds as active ingredient, to the preparation of the compositions mentioned and to the use of the active ingredients or compositions in agriculture or horticulture for controlling or preventing infestation of plants by phytopathogenic microorganisms, preferably fungi
