

A modular connector for cables and pipes has a compressible body (208) with an axial groove provided therein for arrangement of a shielded cable extending from a first end to a second end, and the groove is dimensioned or dimensionable to sealingly fit around a circumference of the shielded or armored cable or the pipe. The connector (200) further comprises a conductor arrangement arranged between the first end and the second end, the conductor arrangement may be sandwiched between the compressible body (208) and a cable screen or armor of the cable or the pipe. The conductor arrangement (210) further extends to an outside of the modular connector (200).
