

Disclosed are compounds of Formula 1, including all stereoisomers, N-oxides, and salts thereof, wherein L is $C(R^{12a})R^{12b}-C(R^{13a})R^{13b}$ -, wherein the carbon atom bonded to R^{12a} and R^{12b} is also bonded to the carboxamide nitrogen atom in Formula 1; or 1,2-phenylene optionally substituted with up to 4 substituents independently selected from halogen and C_1 - C_2 alkyl; and A, Z, R^1 , R^2 , n, G and Q are as defined in the disclosure. Also disclosed are compositions containing the compounds of Formula 1 and methods for controlling plant disease caused by a fungal pathogen comprising applying an effective amount of a compound or a composition of the invention. Also disclosed are methods for controlling a phytophagous nematode comprising contacting the nematode or its environment with a nematocidally effective amount of a compound of Formula I wherein L is $C(R^{12a})R^{12b}-C(R^{13a})R^{13b}$; and A, Z, R^1 , R^2 , n, G and Q are as defined in the disclosure.
