

A door unit for a display cabinet. The door unit comprises frame for holding, in use, at least an upper and a lower sliding door, and linking means for selectively linking the two doors such that when a first one of the doors is opened the linking means engages with the second one of the doors to pull it open also and when the second one of the doors is opened the linking means disengages such that the first door remains closed. The linking means is configured to be concealed from a user.
