

The invention relates to the pharmaceutical industry, in particular to the method for manufacturing the delayed-release dosage form of the analgesic composition based on Ketorolac Trimetamine. The composition comprises the stabilizers taken at a 1:0.16-1:6.6 ratio to Ketorolac Trimetamine, the prolongation substances at a 1:2-1:4 ratio, the preserving substances at a 1:0.016-1:0.5 ratio, and antioxidants at a 1:0.02-1:0.2 ratio. pH of the solution is corrected within 6.9-7.9 range.
