

The invention relates to fungicide mixtures containing, as active components,

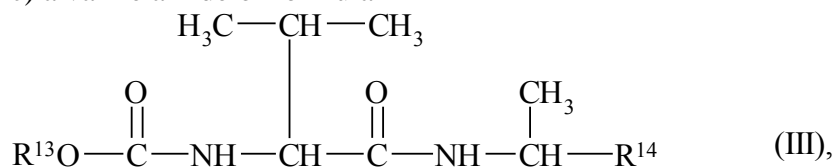

a) an amide compound of formula I

$A-CO-NR^1R^2$  (I),

wherein A,  $R^1$  and  $R^2$  have the meanings given in the description, and

b) dimethomorph or flumetover, and/or

c) a valine amide of formula III

wherein  $R^{13}$  represents  $C_3$ - $C_4$ -alkyl and  $R^{14}$  represents naphthyl or phenyl, whereby the phenyl radical is substituted by a halogen atom, a  $C_1$ - $C_4$ -alkyl- or a  $C_1$ - $C_4$ -alkoxyl group in 4-position, and/or

d) benalaxyl, ofurace, metalaxyl, furalaxyl, or oxydixyl, and/or

e) 1-(2-cyano-2-methoxyiminoacetyl)-3-ethyl urea.

The active components are provided in a synergistically effective quantity.
