

The invention relates to fungicide mixtures containing, as active components, a) an amide compound of formula (I) $A-CO-NR^1R^2$ and b) a dithiocarbamate (II) selected from the group: manganese-ethylene bis(dithiocarbamate) (zinc complex) (IIa); manganese-ethylene bis(dithiocarbamate) (IIb); zinc ammoniate-ethylene bis(dithiocarbamate) (IIc) and zinc-ethylene bis(dithiocarbamate) (IId), or c) a carbamate of formula (III) $(CH_3)_2N-CH_2CH_2CH_2-NH-CO_2-CH_2CH_2CH_3$ or b) a N-acetyl-benzamide of formula (IV) or one of the salts thereof or adducts, or b) an active substance of formula (V), or an active substance of formula (VI), or e) an active substance of formula (VII), whereby the substituents have the meanings given in the description. The active components are provided in a synergistically effective quantity.
