

A polymer composition contains butadiene rubber, sulfur, 2-mercaptobenzothiazole, tetramethylthiuram disulfide, black chalk, alumina, filler and mountain flax. The composition contains branched butadiene rubber with content of 1,2-bonds of at least 70% or artificial butadiene bimodal branched rubber with content of 1,2-bonds of at least 70% as butadiene rubber, barytic concentrate or red iron oxide as filler, and in addition it contains calcium hydroxide and water.
