

The invention relates to the lubricating stuff. The lubricant contains hydrocarbon oil and the sulphurated residual oil. As a sulphurated residual oil the lubricant contains sulphurated crankcase oil and additionally contains oil flux, polymer isobutylene, butene-1 and butene-2, mixture of zinc salt of dialkyldithiophosphoric acid and zinc salt of the product of condensation of alkyl phenol with formaldehyde in the mass ratio of 1:1 and/or the mixture of barium alkylphenolate and zinc dialkyldithiophosphate in the mass ratio of 2.5:1.1.
