

The invention relates to oil-producing industry. Liquefier is formed on basis of solvent of asphalt-tar-paraffin compositions. As solvent composition is chosen at following component ratio, mass %:

Anionic surface-active substance	0,3-0,7
Non-ionic surface-active substance	0,8-1,2
Alkali metal hydroxide with 5,0-40,0% concentration	0,5-8,3
Water of chlorine-calcium type with content of chlorine salts up to 20%	The rest
