

The invention relates to medicine. The use of 1-adamantylethyloxy-3-morpholinopropanol-2 hydrochloride (ademol) as a drug for treatment memory impairment is offered. Ademol is prepared as follows. The mixture of 8.6 g (0.036 mole) adamantylethylglycidyle ester 4.3 g (0.05 mole) morpholine and 0.5 ml water is heated on a water bath for 10 hours, whereupon the morpholine surplus and water are evaporated in vacuum and residuum is rectified.
