

The invention relates to the use of a compound having the formula

$R^1$  and  $R^3$  are independently hydrogen,  $-CH_3$ ,  $\overset{O}{\parallel}C-C_1-C_6$  alkyl or  $\overset{O}{\parallel}C-Ar$  wherein Ar is optionally substituted phenyl;  $R^2$  is selected from the group consisting of pyrrolidino and piperidino; or a pharmaceutically acceptable salt or solvate thereof for inhibiting dysfunctional uterine bleeding.
