

The invention relates to the field of agriculture. A composition is formulated on the basis of N-((4,6-dimethoxypyrimidin-2-yl)-aminocarbonyl)-3-(ethylsulphonyl)-2-pyridinesulphonamid and supplemented with methyl-2-[[N-(4-methoxy-6-methyl-1,3,5-triazine-2-yl)methylaminocarbonyl] aminosulphonyl] benzoate at ratio thereof 1 : 1.2.
