

The present invention is directed to a compound represented by formula (I):

wherein, for example,  $R_1$ ,  $R_2$ ,  $R_3$ , and  $R_4$  each represents a hydrogen atom;  $R_6$  and  $R_7$  each represents a substituted or unsubstituted lower alkyl group;  $A$  represents a group represented by formula (II):

wherein  $R_5$  represents, for example, a hydrogen atom; and  $n$  represents an integer of 2 to 6, or a stereoisomer or optical isomer thereof and a pharmaceutically acceptable salts thereof .
