

The invention relates to the medicine, namely to the abdominal surgery, and may be used for treating peritonitis. The method comprises evacuation of colon content and administration of the sorbent. 0.25% Novocain is applied to the colon via the intubation probe for 5 minutes. Upon emptying, 3% hydrogen peroxide is administered for 3 minutes. Finally, upon emptying, 30% solution of Dimexid with Canamycin is applied for 30 minutes.
