

The invention relates to the medicine and may be used for non-medicamentous treatment of the chronic non-calculous cholecystopancreatitis. The course of the treatment consists of 10-15 sessions comprising the scanning the reflex areas with the helium-neon laser, intravenous irradiation of the blood with the laser beam, laser puncture of the biologically active points, microwave irradiation of the biologically active points, auriculopuncture, electroauriculopuncture, magnetotherapy. The method allows one for reducing the duration of the treatment with increasing remission period.
