

A battery of hydraulic cyclones contains a frame (2) mounted on support (1), a feed chamber (3), drain (4) and sand (5) collectors, and also hydraulic cyclones (6) fixed on the frame (2), which housings (7) have inlet ducts (8) connected with feed space (3), drain branch pipes (9) connected with collection header (4), and sandy branch pipes (10) connected with sand collector (5). The frame (2) is made with seating cases (11), which are fastened between them by connecting links (12, 13, 14, and 15). The hydraulic cyclones (6) are mounted and fixed into seating cases (11) of frame (2).
