

A method and device of preparing an emulsion comprising a first liquid such as water and a second liquid such as a fuel, said method comprising the step of dispersing the first liquid into the second liquid. To prepare the emulsion, the method comprises: • - passing the first liquid through an injection nozzle for creating a spray of droplets of the first liquid, mid • - injecting thus created droplets of first liquid into the second liquid such that the square of the speed of the droplets is at least $225 \text{ m}^2/\text{s}^2$. And a vehicle utilising such a device.
